Subject: [External] Dominion Energy Net Metering Tariff

Public Service Commission,

As a consumer of Dominion Energy I urge you to reject their proposal to drastically increase their service fees for customers who have installed rooftop solar panels (Docket #2020-229-E). While I do not currently have solar panels on the roof of my home, I have considered having them installed in the near future. If Dominion Energy's proposal is approved, it will prevent me from being financially able to install these panels.

There will be no financial incentive for me to move forward on making this purchase.

The solar energy industry in South Carolina provides thousands of jobs and is continuing to expand as we move forward in developing energy alternatives to fossil fuels. Dominion Energy wants to hinder this development.

Again, please deny Dominion Energy's request to implement a net metering tariff on their customers who have installed roof top solar panels.

Thank you,
Mark Geesey

Mount Pleasant, SC
